Abstract: Deep learning methods employ multiple processing layers to learn hierarchical representations of data and have produced state-of-the-art results in many domains. Recently, a variety of model designs and methods have blossomed in the context of natural language processing (NLP). In this paper, we review significant deep learning related models and methods that have been employed for ...

Circumcision pre-dates recorded history. It has been argued that the practice of circumcision, by freeing the penis of a phimotic foreskin, may have conferred a selective advantage that aided sexual intercourse and thus reproduction, so enhancing the competitive success of our species as it evolved [Cox, 1995; Cox & Morris, 2010].
