There is a natural connection between particle physics and representation theory, as first noted in the 1930s by Eugene Wigner. It links the properties of elementary particles to the structure of Lie groups and Lie algebras. According to this connection, the different quantum states of an elementary particle give rise to an irreducible representation of the Poincaré group.

Queer theory is a field of critical theory that emerged in the early 1990s out of the fields of queer studies and women's studies. Queer theory includes both queer readings of texts and the theorization of 'queerness' itself. Heavily influenced by the work of Lauren Berlant, Leo Bersani, Judith Butler, Lee Edelman, Jack Halberstam, and Eve Kosofsky Sedgwick, queer theory builds both upon ...

Matthew Arnold's Culture and Anarchy spells out one of two major theories of culture to emerge around 1870. His theory defines culture in idealist terms, as something to strive for, and in this it helped to shape twentieth-century thinking about the value of the humanities in higher education.
