Rhine era. The publication of J. B. Rhine's book, New Frontiers of the Mind (1937) brought the laboratory's findings to the general public. In his book, Rhine popularized the word "parapsychology", which psychologist Max Dessoir had coined over 40 years earlier, to describe the research conducted at Duke.

The Rhine Research Center explores the frontiers of consciousness and exceptional human experiences in the context of unusual and unexplained phenomena. The Rhine's mission is to advance the science of parapsychology, to provide education and resources for the public, and to foster a community for individuals with personal and professional interest in PSI.
