The transboundary Iskut-Stikine watershed is one of North America's largest and most intact wild salmon watersheds. The Stikine, meaning 'The Great River' in the Tlingit language, covers a diverse range of climates and geography from alpine tundra to ancient coastal rainforests.

Rivers Without Borders

A River Ran Wild is not just the story of a river; It is the story of a watershed, for all the land bordering the river effected the river's health. The land area through which water flows and drains to the lowest point, in a stream, river, lake or estuary, is known as a watershed.

Notes on the DART Adult Passage Dataset. USACE Dams Video and Live Counting: From November through March, video tape fish counting occurs at US Army Corps of Engineers dams with fish ladders on the Columbia and Snake Rivers. Fish counting by video tape takes at least a few days to process: the fish counters have to make, collect, and read the tapes, and then submit their fish counts.
