The SAT Subject Test in Biology is the name of a one-hour multiple choice test given on biology by The College Board. A student chooses whether to take the test depending upon college entrance requirements for the schools in which the student is planning to apply. Until 1994, the SAT Subject Tests were known as Achievement Tests; and from 1995 until January 2005, they were known as SAT IIs.

SAT Subject Test in Biology E/M - Wikipedia

The SAT is typically taken by high school juniors and seniors. The College Board states that the SAT measures literacy, numeracy and writing skills that are needed for academic success in college. They state that the SAT assesses how well the test takers analyze and solve problems—skills they learned in school that they will need in college [citation needed].

Introduction. Patients with obstructive sleep apnea suffer from repeated cycles of upper-airway collapse during sleep, causing

apnea (with increases in CO₂, hypercapnia, and fall in O₂, hypoxia), followed by arousal that re-establishes the airway.

DNA cloning is the process of making multiple, identical copies of a particular piece of DNA. In a typical DNA cloning procedure, the gene or other DNA fragment of interest (perhaps a gene for a medically important human protein) is first inserted into a circular piece of DNA called a plasmid. The insertion is done using enzymes that “cut and paste” DNA, and it produces a molecule of ...
