In governance, sortition (also known as selection by lot, allotment, or demarchy) is the selection of political officials as a random sample from a larger pool of candidates, a system intended to ensure that all competent and interested parties have an equal chance of holding public office. It also minimizes factionalism, since there would be no point making promises to win over key ...

A ganzfeld experiment (from the German for "entire field") is a technique used in parapsychology which is used to test individuals for extrasensory perception (ESP). The ganzfeld experiments are among the most recent in parapsychology for testing telepathy.. Consistent, independent replication of ganzfeld experiments has not been achieved.

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.
