This video clip shows a third grade teacher facilitating positive communication among peers by conducting a “Thoughtful Thursday” activity in which students discuss thoughtful actions or words they have experienced from classmates throughout the week.

Improving Students' Relationships With Teachers

1. Student Self-Reported Grades. Self reported grades comes out at the top of all influences. Children are the most accurate when predicting how they will perform. In a video Hattie explains that if he could write his book *Visible Learning for Teachers* again, he would re-name this learning strategy “Student Expectations” to express more clearly that this strategy involves the teacher ...

Self-compassion and its cultivation in psychological interventions are associated with improved mental health and well-being. However, the underlying processes for this are not well understood. We randomly assigned 135 participants to study the effect of two short-term self-compassion exercises on self-reported-state mood and psychophysiological responses compared to three control conditions ...

Soothing Your Heart and Feeling Connected: A New

The Pygmalion effect, or Rosenthal effect, is the phenomenon whereby others' expectations of a target person affect the target person's performance. The effect is named after the Greek myth of Pygmalion, a sculptor who fell in love with a statue he had carved, or alternately, after the Rosenthal–Jacobson study (see below).. A corollary of the Pygmalion effect is the golem effect, in which ...

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.

Recent years have seen the convergence of two major policy streams in U.S. K–12 education: standards/accountability and teacher quality reforms. Work in these areas has led to the creation of multiple measures of teacher quality, including measures of their instructional alignment to standards/assessments, observational and student survey measures of pedagogical quality, and measures of ...

Defining the Difference: Self-Efficacy, Self-Confidence, and Self-Esteem. While most people generally think of self-esteem and self-confidence as two names for the same thing, and probably rarely think about the term "self-efficacy," these three terms hold slightly different meaning for the psychologists who study them (Druckman & Bjork, 1994; Oney, & Oksuzoglu-Guven, 2015).

Because noncognitive qualities like grit, curiosity, self-control, optimism, and conscientiousness are often described, with some accuracy, as skills, educators eager to develop these qualities in their students quite naturally tend to treat them like the skills that we already know how to teach: reading, calculating, analyzing, and so on. And as the value of noncognitive skills has become ...

CLASSROOM DYNAMICS IN ADULT LITERACY EDUCATION

Psychopathy is traditionally a personality disorder characterized by persistent antisocial behavior, impaired empathy and
remorse, and bold, disinhibited, and egotistical traits. It is sometimes considered synonymous with sociopathy. Different
conceptions of psychopathy have been used throughout history that are only partly overlapping and may sometimes be
contradictory.
