

SNAKE ANIMALS IN THE WILD

## **snake animals in the pdf**

This hypothesis was strengthened in 2015 by the discovery of a 113m year-old fossil of a four-legged snake in Brazil that has been named Tetrapodophis amplexus. It has many snake-like features, is adapted for burrowing and its stomach indicates that it was preying on other animals. It is currently uncertain if Tetrapodophis is a snake or another species, in the squamate order, as a snake-like ...

## **Snake - Wikipedia**

Snake venom is highly modified saliva containing zootoxins which facilitates the immobilization and digestion of prey, and defense against threats. It is injected by unique fangs after a bite, and some species are also able to spit their venom. The glands that secrete the zootoxins are a modification of the parotid salivary gland found in other vertebrates, and are usually situated on each ...
