## **101 Soap Recipes - HotSoapMaking**

Soap is the term for a salt of a fatty acid or for a variety of cleansing and lubricating products produced from such a substance. Household uses for soaps include washing, bathing, and other types of housekeeping, where soaps act as surfactants, emulsifying oils to enable them to be carried away by water. In industry, they are used as thickeners, components of some lubricants, and precursors ...

## **Soap - Wikipedia**

While there are other methods of making soap (hot process and melt & pour), this soap making 101 tutorial provides a basic overview on how to make soap the cold process way. It will be added to my Natural Soap Making page along with other helpful links and recipes; so be sure to bookmark or pin it ...

Glycerin soaps are soaps that contain glycerin, a component of fat or oil.They are recognizably different from other soaps because they are translucent. The clarity is due to the alignment of the soap molecules, which can be induced through the addition of alcohol and sugar.

## **Glycerin soap - Wikipedia**

Selecting soap making oils and butters is a fun and personal process. Each oil and butter contributes various properties to the finished bar. For example, some oils may give a silky lather, while others may contribute extra moisturizing properties.

Introduction . You can read in almost all of the “how to make transparent soap” manuals, that to master the technique, it is a big advantage to be familiar with the hot process soapmaking.. Indeed, but I tell you what – I did try to make transparent soap without any hot process experience.Actually, I only made a few batches of a cold processed soap at that time.
